Profile

I’m a Frontend Developer focused on building fast, responsive, and user-friendly web applications using React.js, Next.js, TypeScript, JavaScript, and Tailwind CSS.

I enjoy turning UI/UX designs into clean, reusable, and scalable interfaces that work smoothly across devices. My experience includes developing responsive layouts, reusable components, integrating REST APIs, working with modern frontend tools, and collaborating through Git and GitHub.

Professional Experience

01/2025 – 02/2026 Lahore	iTitans Digital Solutions Pvt. Ltd., <i>Associate Software Engineer</i> - Developed separate Company Portal and Candidate Portal using Next.js and React.js. - Develop responsive and reusable frontend interfaces using React.js, Next.js, TypeScript, JavaScript, and Tailwind CSS. - Build reusable UI components and data-driven interfaces for real-world web applications. - Integrate REST APIs and handle frontend data, forms, validation, loading, and error states. - Implement responsive layouts and UI designs with a focus on usability, consistency, and performance. - Work with Git and GitHub for version control, code collaboration, and pull requests. - Debug UI and integration issues and collaborate with team members to deliver features reliably.

Projects

Fillo Workforce

 | SaaS Workforce Management Platform

Next.js | React | TypeScript | Tailwind CSS | shadcn/ui | React Query | REST APIs | Git/GitHub

A live SaaS workforce management platform consisting of a Company Portal and Candidate Portal. I have been involved in the project from the beginning, contributing to UI development, feature implementation, bug fixing, and ongoing product improvements.

Key Contributions:

- UI Development — Designed and developed responsive interfaces using Next.js, React, TypeScript, and Tailwind CSS.
- Reusable Components — Built scalable and reusable UI components using shadcn/ui and modern React patterns.
- API Integration — Integrated REST APIs and worked with forms, tables, filters, dialogs, validation, and frontend data.
- Bug Fixing — Identified and resolved UI/UX issues, functional bugs, and application edge cases.

Al Madinah Quran Academy [🔗](#), | *Freelance Project*

UI/UX | HTML | CSS | JavaScript | PHP | SEO | Responsive Web Design

A complete responsive website developed and customized based on the client’s requirements, with a focus on UI/UX, performance, maintainability, and consistency.

Core Features:

- 21 Reusable Course Pages — Built a reusable JavaScript-based course template with JSON-driven content for 21 courses.
- Reusable PHP Structure — Converted repeated page elements into reusable PHP components to keep the code DRY and maintainable.
- Custom Educators Section — Designed and developed a custom layout based on the client’s requirements.
- Custom Fee Structure — Designed and implemented a dedicated fee structure page according to the client’s requirements.

Project Manager | Web Content Writing | SEO

Managed the complete website project as the primary link between the client and development team, overseeing requirements, content, revisions, coordination, and final delivery. Also developed and refined the website content with a focus on SEO, originality, clarity, and alignment with the company’s services.

Core Responsibilities:

- Project Management — Managed the project from requirements to final delivery.
- Client Coordination — Gathered requirements, feedback, and coordinated client communication.
- Development Coordination — Translated requirements into tasks and coordinated with the developer.
- Web Content Writing — Wrote and refined content to clearly present the company’s services.
